Summery

I am a committed full-stack developer, primarily specializing in backend development, while also demonstrating proficiency in frontend development. My skills encompass database design, the creation of robust APIs, thorough testing, and a strong passion for UI development. With a solid grounding in software engineering, both on the backend and frontend, I possess the expertise to conceptualize and implement innovative solutions that adhere to best practices, ensuring the creation of a platform that is testable, maintainable, and reliable.

Skills and Expertise

Programming: **Python, JavaScript, SQL.**

Core Competencies: **Django, Django REST, FastAPI, Flask, Angular, ElasticSearch, Docker, RabbitMQ, Jira, Bitbucket, Sentry, Graphana.**
